### SAAB SPORT & RALLY

The history of Saab is studded with a long succession of competition victories, and we confidently expect many more in the future. Our active competition efforts can very well be regarded as an important part of our car testing activities.

In addition to subjecting new items of equipment to an extremely tough test, racing conditions will reveal any weaknesses in standard equipment, and much of the experience gained in racing is transferred directly to the production models.

Our objective at Saab Sport & Rally is to offer you the benefit of the experience we have gained in all of our competition work, including the major national and international events, such as the RAC Rally, The Artic Rally, the KAK Rally and a host of others.

Sport and Rally parts are designed for the serious off-road competitor, and in cases where items do not affect emissions or safety standards, the owner who wishes to make his Saab a bit sportier.

IMPORTANT NOTICE

The installation of Sport and Rally/Competition equipment may violate the Federal Clean Air Act and/or the National Traffic and Motor Vehicle Safety Act, and possibly also state and/or local safety and emissions control laws.

Sport and Rally/Competition equipment sold by Saab-Scania of America, Inc. is intended strictly for competition/off-road use. Any vehicle which is modified by the installation of Sport and Rally/Competition equipment which adversely affects the vehicle's safety and/or emissions control characteristics may never be used on the public streets or highways.

Without limiting the generality of the foregoing, it must be explained to all customers interested in purchasing Sport and Rally/Competition equipment that the slightest change from the standard tune of Saab engines may result in the vehicle no longer complying with applicable emissions control standards.

If a request is received to sell or install any Sport and Rally/Competition equipment, it is the Saab dealer's responsibility to make the customer aware of these restrictions. Should a dealer accommodate a customer's wishes without assuring that the modified vehicle will be used only for off-road/competition activities, the dealer may be subject to penalties under the Clean Air Act and/or the National Traffic and Motor Vehicle Safety Act.
